# fastIEP

Your district's data will be secure.

fastIEP is a secure, cloud-based web app that processes minimal student data.

We have active data sharing agreements across many states and we are committed to supporting yours.

- End-to-end encryption
- Industry-standard cloud: Amazon Web Services
- Minimal student data (roster data and IEP goals)
- No third-party data sharing
- Students do not log in (only teachers)
- Compliant with FERPA and related laws
- Will retain / dispose data according to your policies
- Simple integration: Import CSVs from existing SIS
- Audit trails; strict access control
- Rapid, concierge-level Tech Support available
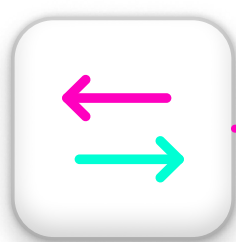

| Data Transfer	Data Storage	Data Backup	Data Access
TLS / SSL	Amazon S3 / Amazon RDS	Amazon RDS / Amazon S3	AWS IAM
Transfers to/from AWS are secured via TLS. An additional level of security is provided by signing with SHA-2. These ensure that your data are encrypted, and are not tampered with, in transit.	Data storage is on industry-standard Amazon S3 & RDS secure services. All data are stored in the US. Data are protected via server-side encryption (SSE), with Amazon S3-Managed Keys as default.	fastIEP creates automated backups of the database daily on RDS. Backups are encrypted at rest and allow point-in-time recovery. Data will be retained / disposed / de-identified per your policy.	fastIEP uses IAM policies & multi-factor authentication to control access to AWS. We use the principles of least privilege. We implement WAF rules to filter, monitor, and block any malicious web traffic.

SUMMARY

fastIEP is a web-based app for IEP data collection and progress monitoring hosted on an industry-standard secure cloud using industry best practices for data security and privacy. No third-party data sharing; no student logins; FERPA compliant. You can integrate fastIEP easily by importing CSVs of student roster and IEP goal data. We offer highly responsive technical support, and scalability. We look forward to partnering with your district to reduce the workload of your teachers, increase compliance, and enhance data management efficiency.
